Quote  
Last year WNRCD generously included the Oracle Community Learning Garden in a \$50,000.00 grant. Not only did the District provide money, they also contributed volunteer hours and expertise to help us construct two 40' hoop houses. The hoop houses are used to help sustain the garden - we have successfully grown plant starts which we sold to our gardeners and residents of our surrounding communities. We are grateful for our current project with WNRCD which includes growing nearly 1,000 trees for a restoration project along the Gila River. WNRCD has gone out of its way to provide support during this amicable relationship.

Explanation for No Projects  
Resource Assessment is in progress

## NRCD Program Projects

### NRCD-Proj-Program-849

Type  
Natural Resource Project

Title  
Resource Assessment Program

#### Summary

Resource Needs Assessments are a comprehensive analysis of the work needed to be done to achieve natural resource conservation goals set by a Conservation District. NRCDs work with partners and stakeholders to develop or update resource assessments that address local conservation priorities and the needs of their cooperators for conserving soil, water, and related resources within their District. The assessment is based on input from cooperators, interested stakeholders, and partners using science-based information. The purpose of an RNA is to ensure that conservation efforts address the most important local resource needs.

#### Importance

The District will be able to use this information in Local Working Group meetings to develop long range plans and target funds for their most important resource needs.
